RNF-01		
RNF-02		

- la base de datos tiene que estar actualizada con un máximo de una semana
- la datos del usuario deben estar cifrados ??????????
- la página debe responder en menos de 8 segundos ??????????
- la página debe ser intuitiva ??????????
- el código del frontend debe estar ofuscado ??????????
- la pagina debe poder cargar fácilmente un nuevo scrapper

Historias de usuario

Epic 1. Account and Profile

US-1: Create an account [MUST]	
As a	New user
I want	To create an account with my email and password
So that	My preferences and outfits are saved.
Acceptance Criteria	

- | | |
|---|--|
| 1 | Given the user is on the sign-up form, when they enter an invalid email or password, then the form shows a validation error. |
| 2 | Given the user entered a valid email and password, when they submit the form, then the account is created and the user can log in. |

US-2: Log in and log out [MUST]

As a User

I want To log in and log out

So that My information stays private.

Acceptance Criteria

- | | |
|---|---|
| 1 | Given the user has an account, when they enter correct credentials, then the session opens. |
| 2 | Given the user is logged in, when they click log out, then the session closes. |
| 3 | Given the user is on the login page, when they enter wrong credentials, then an error message is shown. |

US-3: Sign in with Google [COULD]

As a User

I want To sign in with my Google account

So that I do not have to remember another password.

Acceptance Criteria

- | | |
|---|--|
| 1 | Given the user is on the login page, when the page loads, then a "Continue with Google" button is shown. |
| 2 | Given the user chooses to sign in with Google, when Google confirms their identity, then the account is created or linked automatically. |

US-4: Recover password by email [SHOULD]

As a User

I want To recover my password by email

So that I can get back into my account if I forget it.

Acceptance Criteria

- | | |
|---|--|
| 1 | Given the user forgot their password, when they ask for a reset with their email, then a reset link is sent to that email. |
|---|--|

2

Given the user received a reset link, when the link stays unused for too long, then the link expires.

US-5: Edit my profile [SHOULD]

As a User

I want To edit my profile (name, email, country,sizes)

So that My account shows my real information.

Acceptance Criteria

1

Given the user is on their profile page, when they edit their information and save, then the changes are saved and shown right away.

US-6: Delete my account and data [SHOULD]

As a User

I want To delete my account and my data

So that I control my personal information.

Acceptance Criteria

1

Given the user is in their account settings, when they choose to delete the account, then the app asks them to confirm.

2

Given the user confirmed the deletion, when the process finishes, then all their personal data is removed.

US-7: Search without an account [SHOULD]

As a Visitor

I want To use the search without an account

So that I can try the app before registering.

Acceptance Criteria

1

Given a visitor has no account, when they use the search and filters, then the results are shown without login.

2

Given a visitor has no account, when they try to save an outfit, then the app asks them to register.

Epic 2. User Preferences

US-8: Setup guide for new users [SHOULD]

As a	New user
I want	A short setup guide when I first enter
So that	I can set my preferences quickly.
Acceptance Criteria	
1	Given a user logs in for the first time, when the home page loads, then a step-by-step setup form appears.
2	Given the setup form is shown, when the user chooses to skip it, then they go into the app without saving preferences.

US-9: Select liked brands [SHOULD]

As a	User
I want	To select the brands I like
So that	I see them first in the results.
Acceptance Criteria	
1	Given the user is choosing preferences, when they open the brand list, then they can pick many brands.
2	Given the user saved liked brands, when they see the search results, then items from those brands get higher priority.

US-10: Choose favorite colors [SHOULD]

As a	User
I want	To choose my favorite colors
So that	The results match my palette.
Acceptance Criteria	
1	Given the user is choosing preferences, when they open the color section, then a color picker or color list is available.
2	Given the user selected favorite colors, when they save, then the selected colors are saved.

US-11: Set price range [MUST]

As a User
I want To set my price range
So that I only see items I can afford.

Acceptance Criteria

- 1 Given the user is on the preferences page, when they set a minimum and a maximum price, then the price range is saved.
- 2 Given a price range is saved, when the user looks at the results, then only items inside the range are shown.

US-12: Save my sizes [SHOULD]

As a User
I want To save my sizes (tops, bottoms, shoes)
So that I only see items available in my size.

Acceptance Criteria

- 1 Given the user is on the preferences page, when they enter sizes for tops, bottoms and shoes, then the sizes are saved per category.
- 2 Given sizes are saved, when the user searches, then the search can filter by the saved size.

US-13: Choose fit preference [SHOULD]

As a User
I want To choose my fit preference (oversized, slim, regular)
So that The items match how I like to dress.

Acceptance Criteria

- 1 Given the user is on the preferences page, when they select one or more fits, then the fits are saved.
- 2 Given fits are saved, when the user searches or gets suggestions, then the fit is used in filters and suggestions.

US-14: Set maximum budget [MUST]

As a User

I want	To set a maximum budget
So that	The app warns me if my outfit is too expensive.
Acceptance Criteria	
1	Given the user is on the preferences page, when they type a maximum budget, then the budget is saved.
2	Given a budget is saved, when the outfit total goes over it, then a warning appears.

US-15: Edit preferences anytime [MUST]

As a	User
I want	To edit my preferences at any time
So that	The app changes when my taste changes.
Acceptance Criteria	
1	Given the user is on the settings page, when they edit their preferences and save, then the changes are stored.
2	Given preferences were updated, when the user looks at the recommendations, then the recommendations are updated.

US-16: Reset preferences [COULD]

As a	User
I want	To reset my preferences to default
So that	I can start again.
Acceptance Criteria	
1	Given the user is on the preferences page, when they press the reset button, then the app asks for confirmation.
2	Given the user confirmed the reset, when the action finishes, then all preferences are cleared.

US-17: View preferences summary [MUST]

As a	User
I want	To see a summary of my preferences
So that	I can check if they are correct.

Acceptance Criteria

1

Given the user has saved preferences, when they open their profile page, then all saved preferences are shown in one place.

Epic 3. Product Search and Filtering

US-18: Search clothing by text [MUST]

As a

User

I want

To search for clothing by text (for example "black cargo pants")

So that

I quickly find what I need.

Acceptance Criteria

1

Given the user is on the search page, when they type words like "black cargo pants" and search, then the search returns items that match the words typed.

US-19: See results from many stores [MUST]

As a

User

I want

To see results from many stores in one page

So that

I do not have to visit each website.

Acceptance Criteria

1

Given the user searches for an item, when the results load, then items from at least two different stores are shown.

2

Given results are shown, when the user looks at an item, then the store name is displayed on it.

US-20: Filter by price [MUST]

As a

User

I want

To filter by price

So that

I only see items in my range.

Acceptance Criteria

1

Given the user is on the results page, when they use the price slider or price inputs, then the results update to that price.

US-21: Filter by brand [MUST]

As a User

I want To filter by brand

So that I can look at only the brands I want.

Acceptance Criteria

1

Given the user is on the results page, when they select one or more brands in the brand filter, then only items from those brands are shown.

US-22: Filter by color [MUST]

As a User

I want To filter by color

So that I find items in the color I need.

Acceptance Criteria

1

Given the user is on the results page, when they select a color in the color filter, then the results update to that color.

US-23: Filter by size [MUST]

As a User

I want To filter by size

So that I only see available sizes.

Acceptance Criteria

1

Given the user is on the results page, when they select a size, then only items with stock in that size are shown.

US-24: Filter by clothing type [MUST]

As a User

I want To filter by clothing type (top, bottom, shoes, accessories)

So that I can focus my search.

Acceptance Criteria

1

Given the user is on the results page, when they select a category or subcategory (for example hoodie or jacket), then only items of that category are shown.

US-25: Filter by material [COULD]

As a User

I want To filter by material (cotton, denim, polyester, etc.)

So that I choose comfortable or quality clothes.

Acceptance Criteria

1

Given the store provides material data, when the user selects a material, then only items made of that material are shown.

US-26: Filter by store [MUST]

As a User

I want To filter by store

So that I can include or exclude specific shops.

Acceptance Criteria

1

Given the user is on the results page, when they select or unselect stores, then the results include or exclude items from those stores.

US-27: Sort results by price [MUST]

As a User

I want To sort results by price

So that I can organize what I see.

Acceptance Criteria

1

Given the user is on the results page, when they choose to sort by price, then the order of the results changes.

US-28: Clear all filters [SHOULD]

As a	User
I want	To clear all filters with one click
So that	I can start a new search fast.
Acceptance Criteria	
1	Given the user has applied filters, when they press "Clear filters", then all filters are reset.

US-29: Personalize results [SHOULD]

As a	User
I want	The results to be personalized with my preferences
So that	The first items match my taste.
Acceptance Criteria	
1	Given the user has saved preferences, when they search, then the results consider saved brands, colors, sizes and price range.
2	Given personalization is on, when the user turns it off, then the results are shown without using preferences.

US-30: View recent searches [COULD]

As a	User
I want	To see my recent searches
So that	I can repeat them easily.
Acceptance Criteria	
1	Given the user has searched before, when they open the search bar, then the last searches are listed.
2	Given recent searches are listed, when the user deletes one, then it is removed from the list.

US-31: No-results message [SHOULD]

As a	User
I want	A clear message when there are no results
So that	I know what to do next.

Acceptance Criteria

1

Given a search has no matches, when the results page loads, then a "no results" message is shown with tips (remove filters, try other words).

US-32: Pagination or infinite scroll [MUST]

As a

User

I want

Pagination or infinite scroll

So that

The page loads fast even with many products.

Acceptance Criteria

1

Given a search has many products, when the results load, then they load in small groups and the page does not freeze.

Epic 4. Product Details and Similar Products

US-33: Open product page [MUST]

As a

User

I want

To open a product page

So that

I can see all its information.

Acceptance Criteria

1

Given the user sees an item in the results, when they open it, then the product page shows name, images, price, brand, material, color, sizes and store.

US-34: See product photos [MUST]

As a

User

I want

To see photos of a product

So that

I can check how it looks.

Acceptance Criteria

1

Given the user is on a product page, when the page loads, then a gallery with at least one image is shown.

US-35: See available sizes [MUST]

As a	User
I want	To see which sizes are available
So that	I know if the item fits me.
Acceptance Criteria	
1	Given the user is on a product page, when they look at the sizes, then available and unavailable sizes are marked differently.

US-36: Group similar products [WOULD]

As a	User
I want	To see similar products grouped together
So that	I can compare options easily.
Acceptance Criteria	
1	Given there are similar items in the results, when the user views them, then similar items are grouped by type, color and style.

US-37: "You may also like" section [WOULD]

As a	User
I want	To see a "You may also like" section
So that	I discover more items.
Acceptance Criteria	
1	Given the user is on a product page, when the page loads, then a "You may also like" section shows suggestions based on the viewed item and the user preferences.

US-38: Link to store page [MUST]

As a	User
I want	A direct link to the store page
So that	I can buy the item there.
Acceptance Criteria	

1

Given the user is on a product page, when they click the store link, then the original product page opens in a new tab.

US-39: See last price update [COULD]

As a User

I want To see the last time the price was updated

So that I know if the information is recent.

Acceptance Criteria

1

Given the user is on a product page, when the page loads, then an "Updated on" date is shown.

US-40: Report a wrong product [WOULD]

As a User

I want To report a wrong product (bad price, wrong image, broken link)

So that The information gets fixed.

Acceptance Criteria

1

Given the user finds a wrong product, when they press "Report problem", then the report is sent to the admins.

Epic 5. Price Comparison

US-41: Highlight cheapest option [COULD]

As a User

I want The cheapest option to be highlighted

So that I notice it quickly.

Acceptance Criteria

1

Given the same item is sold in different stores, when the prices are shown, then the lowest price has a badge or a different color.

US-42: Compare products side by side [MUST]

As a	User
I want	To compare two or more products side by side
So that	I can decide between them.
Acceptance Criteria	
1	Given the user selected two or more products, when they open the comparison, then a table shows price, brand, material, color, sizes and rating.

US-43: Show prices in COP [MUST]

As a	User
I want	The price to include a clear currency (COP)
So that	There is no confusion.
Acceptance Criteria	
1	Given prices are shown anywhere in the app, when the user looks at them, then all prices show the same currency format (COP).

Epic 6. Outfit Builder

US-44: Start a new outfit [MUST]

As a	User
I want	To start a new outfit from scratch
So that	I can create my own look.
Acceptance Criteria	

1

Given the user is on the outfit page, when they press "New outfit", then an empty builder opens.

US-45: Add a top to the outfit [MUST]

As a User

I want To add a top (t-shirt, shirt, hoodie, jacket) to my outfit

So that I build the upper part.

Acceptance Criteria

1

Given the user is in the outfit builder, when they select a t-shirt, shirt, hoodie or jacket, then the item is placed in the top slot.

US-46: Add a bottom to the outfit [MUST]

As a User

I want To add a bottom (jeans, cargo, pants, shorts) to my outfit

So that I build the lower part.

Acceptance Criteria

1

Given the user is in the outfit builder, when they select jeans, cargo pants, pants or shorts, then the item is placed in the bottom slot.

US-47: Add shoes to the outfit [MUST]

As a User

I want To add shoes (sneakers, boots, shoes) to my outfit

So that My look is complete.

Acceptance Criteria

1

Given the user is in the outfit builder, when they select sneakers, boots or shoes, then the item is placed in the shoes slot.

US-48: Add accessories [COULD]

As a User

I want To add optional accessories (cap, glasses, bag, watch)

So that I can complete my look.

Acceptance Criteria

1

Given the user is in the outfit builder, when they add an accessory, then it is added to the outfit.

2

Given the user is in the outfit builder, when they skip the accessories, then the outfit stays complete without them.

US-49: Replace a piece [MUST]

As a

User

I want

To replace any piece of the outfit

So that

I can try different combinations.

Acceptance Criteria

1

Given the outfit has pieces, when the user presses "Change" on a piece, then a list of alternatives opens.

US-50: Live outfit update [MUST]

As a

User

I want

To see the outfit update immediately after changing a piece

So that

I can judge the new combination.

Acceptance Criteria

1

Given the user is in the outfit builder, when they change a piece, then the visual display updates without reloading the page.

US-51: Remove a piece [SHOULD]

As a

User

I want

To remove a piece from the outfit

So that

I can simplify my look.

Acceptance Criteria

1

Given the outfit has a piece, when the user presses "Remove" on it, then the piece is deleted from the outfit.

US-52: Add products from search results [MUST]

As a

User

I want

To add products to the outfit directly from the search results

So that

I do not lose time.

Acceptance Criteria

1

Given the user is on the results page, when they look at a product card, then an "Add to outfit" button appears on it.

US-53: See outfit total price [MUST]

As a

User

I want

To see the total price of my outfit

So that

I control my spending.

Acceptance Criteria

1

Given the outfit has pieces, when a piece is added, changed or removed, then the total price updates.

US-54: Over-budget warning [MUST]

As a

User

I want

To see a warning when my outfit is over my budget

So that

I can adjust it.

Acceptance Criteria

1

Given the user has a budget, when the outfit total is higher than the budget, then a warning message appears.

US-55: See the store of each piece [MUST]

As a

User

I want

To see which store each piece comes from

So that

I know where to buy it.

Acceptance Criteria

1

Given the outfit has pieces, when the user looks at a piece, then its store name and price are shown.

US-56: Undo and redo changes [WOULD]

As a

User

I want

To undo and redo my last changes

So that

I can go back if I do not like a change.

Acceptance Criteria

1

Given the user made changes to the outfit, when they press undo or redo, then the latest action is reversed or restored.

US-57: Lock a piece [WOULD]

As a

User

I want

To lock a piece

So that

It stays the same while I change the other ones.

Acceptance Criteria

1

Given the outfit has pieces, when the user locks a piece with the lock icon, then the piece stays fixed while the other pieces change.

US-58: Style mismatch tips [WOULD]

As a

User

I want

The app to tell me if two pieces do not match well (color or style)

So that

I get better combinations.

Acceptance Criteria

1

Given two pieces do not match well in color or style, when they are in the same outfit, then a soft warning with a short reason appears.

2

Given the warning is shown, when the user ignores it, then they can keep the outfit, because it is a tip and not a block.

Epic 7. Outfit Visualization

US-59: Visual outfit composition [MUST]

As a	User
I want	To see my outfit as a visual composition of the clothes
So that	I can check how the pieces look together.
Acceptance Criteria	
1	Given the outfit has pieces, when the user opens the display, then the pieces are shown together in one display.

US-60: Virtual mannequin view [WOULD]

As a	User
I want	To see my outfit on a virtual mannequin
So that	It feels closer to real clothes.
Acceptance Criteria	
1	Given the outfit has pieces, when the user opens the mannequin view, then the pieces are placed on a mannequin.

US-61: Zoom in on the outfit [WOULD]

As a	User
I want	To zoom in on my outfit
So that	I can see the details.
Acceptance Criteria	
1	Given the outfit is on the display, when the user uses the zoom controls, then the display zooms in and out.

US-62: Switch visualization modes [WOULD]

As a	User
I want	To switch between visualization modes (composition, mannequin, avatar)

So that	I choose what I like most.
Acceptance Criteria	
1	Given the outfit is on the display, when the user picks another visualization mode, then the mode changes without losing the outfit.

Epic 8. Saved Items, Wishlist and Sharing

US-63: Save favorite products [SHOULD]

As a	User
I want	To save products to a favorites list
So that	I can find them later.
Acceptance Criteria	
1	Given the user is looking at a product, when they click the heart icon, then the product is added to or removed from favorites.

US-64: Save outfits with a name [MUST]

As a	User
I want	To save my outfits with a name
So that	I can come back to them.
Acceptance Criteria	
1	Given the user has an outfit, when they save it with a name, then it is stored in "My outfits" with that name.

US-65: Edit or delete saved outfits [SHOULD]

As a	User
I want	To edit or delete my saved outfits
So that	I keep them organized.

Acceptance Criteria

1

Given the user has saved outfits, when they look at a saved outfit, then edit and delete options are available.

US-66: Outfit collections [WOULD]

As a

User

I want

To organize my saved outfits in collections (for example "University", "Party")

So that

I find them faster.

Acceptance Criteria

1

Given the user has saved outfits, when they create a collection and add outfits to it, then the outfits appear inside that collection.

US-67: Duplicate a saved outfit [WOULD]

As a

User

I want

To duplicate a saved outfit

So that

I can make a new version without losing the original.

Acceptance Criteria

1

Given the user has a saved outfit, when they press "Duplicate", then a copy is created and the original stays the same.

US-68: Buy each piece in its store [MUST]

As a

User

I want

To open the store page of each piece of my outfit

So that

I can buy them one by one.

Acceptance Criteria

1

Given the outfit has pieces, when the user presses "Buy" on a piece, then they go to the correct store.

US-69: Export shopping list [SHOULD]

As a

User

I want

To export my shopping list (pieces, stores, prices and links)

So that I can buy them later.

Acceptance Criteria

1

Given the user has an outfit, when they export the shopping list, then the list can be copied or downloaded as PDF or text.

Epic 9. Admin and Data Management

US-70: Manage stores [MUST]

As a Admin

I want To add and manage the stores we collect data from

So that The catalog stays organized.

Acceptance Criteria

1

Given the admin is in the store panel, when they create, edit, activate or deactivate a store, then the change is saved.

US-71: Collect products automatically [MUST]

As a Admin

I want The system to collect products automatically from the stores

So that The catalog is always full.

Acceptance Criteria

1

Given a store is active, when the scraping process runs, then the products are saved in the database.

US-72: Schedule data collection [COULD]

As a Admin

I want The data collection to run on a schedule (for example every day)

So that Prices are up to date.

Acceptance Criteria

1

Given a schedule is set, when the set time arrives, then the scheduler runs the data collection.

US-73: View collection logs [WOULD]

As a

Admin

I want

To see logs and errors of each data collection

So that

I can fix problems.

Acceptance Criteria

1

Given data collection has run, when the admin opens the log page, then the date, store, status and errors are shown.

US-74: Standardize product data [MUST]

As a

Admin

I want

The system to clean and standardize product data (names, colors, sizes, categories)

So that

Filters work well.

Acceptance Criteria

1

Given products come from different stores, when the data is processed, then different names for the same color or size are turned into one standard value.

US-75: Review user reports [WOULD]

As a

Admin

I want

To review the reports sent by users

So that

I can correct wrong data.

Acceptance Criteria

1

Given users sent reports, when the admin opens the reports page, then a list of reports with status (open, solved) is shown.

US-76: Edit or hide a product [SHOULD]

As a

Admin

I want	To manually edit or hide a product
So that	I can remove bad data.
Acceptance Criteria	
1	Given the admin is viewing a product, when they edit or hide it, then the change is applied to the product.

US-77: View basic statistics [WOULD]

As a	Admin
I want	To see basic statistics (users, searches, most viewed items)
So that	I understand how the app is used.
Acceptance Criteria	
1	Given the app has activity, when the admin opens the dashboard, then simple numbers and charts (users, searches, most viewed items) are shown.

MoSCoW PRIORITIZATION

MUST: Critical and essential requirements for the system.

SHOULD: Important requirements that are not critical.

COULD: Desirable requirements if time and resources allow.

WOULD: Requirements that will not be delivered in this version but may be reconsidered in the future.
